

CT Conference UCC Environmental Ministry Team January, 2010 Special Announcement

The CT Conference EMT met on Tuesday, Jan12, 2010.

Before the meeting, our Conference Minister, the Rev. Davida Crabtree, made a special announcement.

She told us that, at a meeting last week, the six New England Conference Ministers decided to make Stewardship of God's Creation a "signature issue" for the six conferences. According to Davida, without reverent stewardship of creation, all the other issues of care and concern to Christians will be compromised and made more difficult to achieve.

We know that you share this view. That is why you have been interested, involved and participated in various activities of our CT Conference Environmental Ministry Team effort and events.

The efforts of many of you – drafting the "Resolution on the Urgency for Action on Climate Change", preparing tables and presentations at Conference meetings, developing the Green Church Action Steps, organizing workshops around the state, researching issues and participating in EMT activities - give evidence to the Conference Ministers that there are many who will work to make a difference in this effort

Our regular meeting minutes will follow, but we wanted to share this news with you right away,

For the EMT,

Katherine Freygang
George Stone
Co-chairs
